In this novel introduction to modern microeconomic theory, Samuel Bowles
returns to the classical economists’ interest in the wealth and poverty of
nations and people, the workings of the institutions of capitalist economies,
and the coevolution of individual preferences and the structures of markets,
firms, and other institutions. Using recent advances in evolutionary game
theory, contract theory, behavioral experiments, and the modeling of dynamic
processes, he develops a theory of how economic institutions shape individual
behavior, and how institutions evolve due to individual actions, technological
change, and chance events.

SAMUEL BOWLES is Research Professor and Director of the
Behavioral Sciences Program at the Santa Fe Institute, and Professor of
Economics at the University of Siena. He is coauthor of Notes and Problems in
Microeconomic Theory and Schooling in Capitalist America.

“This book may be a turning point in bringing economics back to its real political
economic roots.”

—Ariel Rubinstein, Tel Aviv University
and New York University

“[A] brilliant synthesis. . . . Microeconomics will be an indispensable part of future
teaching in microeconomics at the graduate or advanced undergraduate levels, as well as
an excellent source of information for the practicing economist.”

—Kenneth J. Arrow, Stanford University

“An important and highly original book.”

—Peyton Young, Johns Hopkins University
and University of Oxford

“Homo economicus is dead, but whose Homo behavioralis will replace him? For those who
care, this sustained and honest attempt to explore the implications for economic
theory of one of the leading candidates is essential reading.”

—Ken Binmore, University College London
